

8200 ENTREPRENEURSHIP & INNOVATION SUPPORT PROGRAM

8200 EISP

8200 EISP Start-up Accelerator

Founded in 2011, 8200 EISP was the first start-up accelerator in Israel.

Our vision is to harness the vast network of 8200 alumni in order to promote and empower early stage, first-time entrepreneurs from all industries and, by doing so, help all of Israeli society.

The 8200 program is a non-profit organization, established by the 8200 Alumni Association. The program is not limited to 8200 alumni but is open to all talented entrepreneurs from across Israel.

Each year, 400+ start-ups apply to join the 8200 accelerator, however only 20 hand-picked teams are accepted.

The 8200 EISP's core is an intensive 5 month hands-on workshop for 1 leading entrepreneur from each start-up. These workshops cover every aspect of a start-up's life from: Product & Marketing, Finance, Fundraising, Legal, Team-building, and so forth. The program also provides a workplace in WeWork Tel Aviv, top mentors and all the other tools start-ups need in order to succeed.

We believe that the entrepreneurial journey is a personal challenge, and hence, we focus on developing 1 leading representative from each start-up leadership abilities. The workshop ends with the famous 8200 EISP Demo Day - a prestigious and exclusive event, with 350 investors in the audience, in which the 20 teams showcase their start-ups.

Some of our alumni include leading start-ups: Lagoon Security (acquired by CheckPoint), Zipory (acquired by Como), Desti (acquired by Microsoft), Carambola, WireX Systems, Yeloha, NextPeer, Storee, Medasense, and Evolero.

8200 EISP is funded and supported by our partners, all leaders in their respective fields. Our partners include Bank Hapoalim (the largest bank in Israel), EY Israel, law firms Naschitz Brandes Amir and Pearl Cohen Zedek Latzer Baratz, the BRM Group, Battery Ventures, AOL Israel, Nextage and WeWork Israel.
